Overview

Oracle Retail Convenience Store Back Office is a complete solution for reconciliation, sales tracking and stock management in the retail environment. With a full sales and purchase ledger and integrated electronic ordering it provides a powerful end-to-end solution for both wet and dry stock retailing.

Functional Enhancements

The functional enhancements below are included in this release.

RCSBO-10 – Add Tank Capacity to POS Pump Configuration

When a pump configuration file is built, Iridium2 sites will also have the capacity field added to aid with tank reporting from SMS.

RCSBO-13 – Deploy Micros Loyalty Server

When installed on a site with Iridium2 Point of Sale terminals the new Micros Loyalty Server will be applied to these terminals.

Fixed Issues/Defects

The following defects and issues have been fixed since the previous release:

RCSBO-5 – Secondary EFT Interface Not Disabled

When the primary EFT interface does not support a secondary interface the secondary interface was not being disabled and an error could occur on the Iridium POS. The secondary interface will now be disabled correctly.

RCSBO-6 – Voided OPT Transactions Not Handled Correctly

Voided OPT transactions are now imported as a 'canceled' transaction.

RCSBO-7 – Error 5 Opening Stock Card with Price Profile Applied

This error has now been corrected and stock cards open as expected.

RCSBO-8 – Spelling Mistake in Aged Debtors Report

Spelling mistake has been corrected.

RCSBO-9 – Remove PrismSafeguard from Prism Installer

PrismSafeguard is no longer included in the update file. Should PrismSafeguard be on site, it will be closed and restarted during the update procedure.

RCSBO-11 – Local Account Cards Not Recognized

If a local account card was added to the system that exceeded the limit of an integer (2147483647) then this and any later entries were not recognized. This has been corrected.

RCSBO-15 – POSImport Stalling Re-Exporting POS Transactions

The POSImport service could get in to a situation where it became unresponsive trying to re-export missing transactions from the POS. This has been amended and the re-export of transactions can now be disabled completely.

RCSBO-16 – Remove Restrictions on SHFTTOTS Cleanup

Some sites had persistent issues with historical shift IDs being duplicated. Historical shift IDs are now cleaned down across all sites.

Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible to all users, including users that are disabled. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit
