

**Name** show-component-status– displays the status of the deployed component

**Synopsis** show-component-status  
[ --help]  
[ --target *target*]  
*component-name*

**Description** The show-component-status subcommand gets the status (enabled or disabled) of the deployed component.

This subcommand is supported in remote mode only.

**Options** --help  
Displays the help text for the subcommand.

--target  
Do not specify this option. This option is retained for compatibility with other releases. If you specify this option, a syntax error does not occur. Instead, the subcommand runs successfully and the option is silently ignored.

**Operands** *component-name*  
The name of the component whose status is to be listed.

**Examples** **EXAMPLE 1** Showing the Status of a Component

This example gets the status of the MEjbApp component.

```
asadmin> show-component-status MEjbApp
Status of MEjbApp is enabled
Command show-component-status executed successfully.
```

**Exit Status** 0 subcommand executed successfully  
1 error in executing the subcommand
