

**Name** delete-domain– deletes a domain

**Synopsis** delete-domain [--help] [--domaindir *install-dir/domains*] *domain-name*

**Description** The delete-domain subcommand deletes the specified domain. The domain must already exist and must be stopped.

This subcommand is supported in local mode only.

**Options** --help

-?

Displays the help text for the subcommand.

--domaindir

The directory where the domain to be deleted is located. If specified, the path must be accessible in the file system. If not specified, the domain in the default *install-dir/domains* directory is deleted.

**Operands** *domain-name* The unique name of the domain you want to delete.

**Examples** EXAMPLE 1 Deleting a Domain

This example deletes a domain named sampleDomain from the /export/domains directory.

```
asadmin> delete-domain --domaindir /export/domains sampleDomain
Domain sampleDomain deleted
```

**Exit Status** 0 subcommand executed successfully

1 error in executing the subcommand
