

Configuring Lightweight Reporting for Eigner PLM 5.1

1. Run the sqlplus script axalant/db_util/oracle/sql/axa_txt_plm51.sql
2. Load the loader file axalant/dmp/dtv_txt_plm51.dat
3. Check Eigner PLM environment for Report_Service_URL/Report Service URL in the current eigner PLM environment
4. Set the "Report_Service_URL" to an existing WPS host and port like this:
http://<host>:8088/reporter/report
5. Make sure that the Web environment is created and the Web Presentation Service is started.
6. Turn on Import/Export functionality
7. Select the menu Manager->Configure System->Licenses
8. Turn on the "Interchange Tools" checkbox.
9. Save Changes
10. Add menu selections to launch the reporter:

Example:

In the Item Mask, you can add the following menu selections in a sub menu:

```
EDB-BAS-ART-REP-1    10    Single Level    a    txttmp_men_rep  
/TYPE=ItemSingleBomDoc /PARAM=T_MASTER_DAT.PART_ID    1    1
```

```
EDB-BAS-ART-REP-2    20    Multi Level    a    txttmp_men_rep  
/TYPE=ItemMultiBomDoc /PARAM=T_MASTER_DAT.PART_ID    1    1
```

In the Work Request Mask you can add the following menu selection:

```
EDB-BAS-EWR-REP    10    Report a    txttmp_men_rep  
/TYPE=EwrReport /PARAM=T_EWR_DAT.ELEM_ID    1    1
```
